5. Remove last pin and fold petal in half enclosing the folds from the last step. Take your pin and insert through the middle of your petal, making sure to secure all layers and folds. Your folded petal will look like this both on the bottom, and the front:

6. Continue making petals as desired. We used seven petals in this flower.

7. Trim  $\frac{1}{4}$ " from the bottom, raw edge of your petal piece, allowing for a neater finish.

8. Using a needle and thread {doubled over and knotted to secure the ends}, thread your petals on, one-by-one, through the centres. Remove pins as you go. It is important to make sure you are sewing through all layers and folds, or your petal will unravel.

9. Secure the last petal to the first by sewing the bases of each petal together, both on the front, and the back of your flower.

10. Manipulate and arrange your petals, securing where needed. These centre stitches will be covered, so there is no need to disguise them yet! Set flower aside for a moment.
