

INGREDIENTS

Template (download below in PRINTER FRIENDLY VERSION)

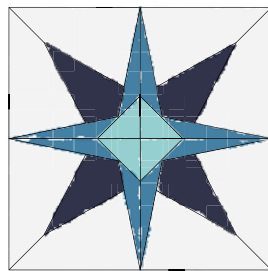

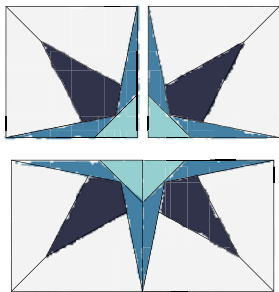

Fabric pieces in 4 colors large enough to cover template sections

INSTRUCTIONS

- 1 Print Sailor Star templates. You will need 4 copies to make a complete block. Use standard printer paper.
- 2 Cut more than enough fabric to cover each of the sections. You don't want to short yourself so make sure you have plenty of overlap!
- 3 Paper piece the block in numbered order as shown in the template. Remember to shorten your stitch length to make it easier to tear off the paper when you have finished. If you are new to paper piecing, take a look at this tutorial for the basics.
- 4 Repeat to make 4 paper pieced sections.
- 5 Remove the paper and square up each section to 6.5" square.

ASSEMBLE THE BLOCK

Join the units together to complete the block.

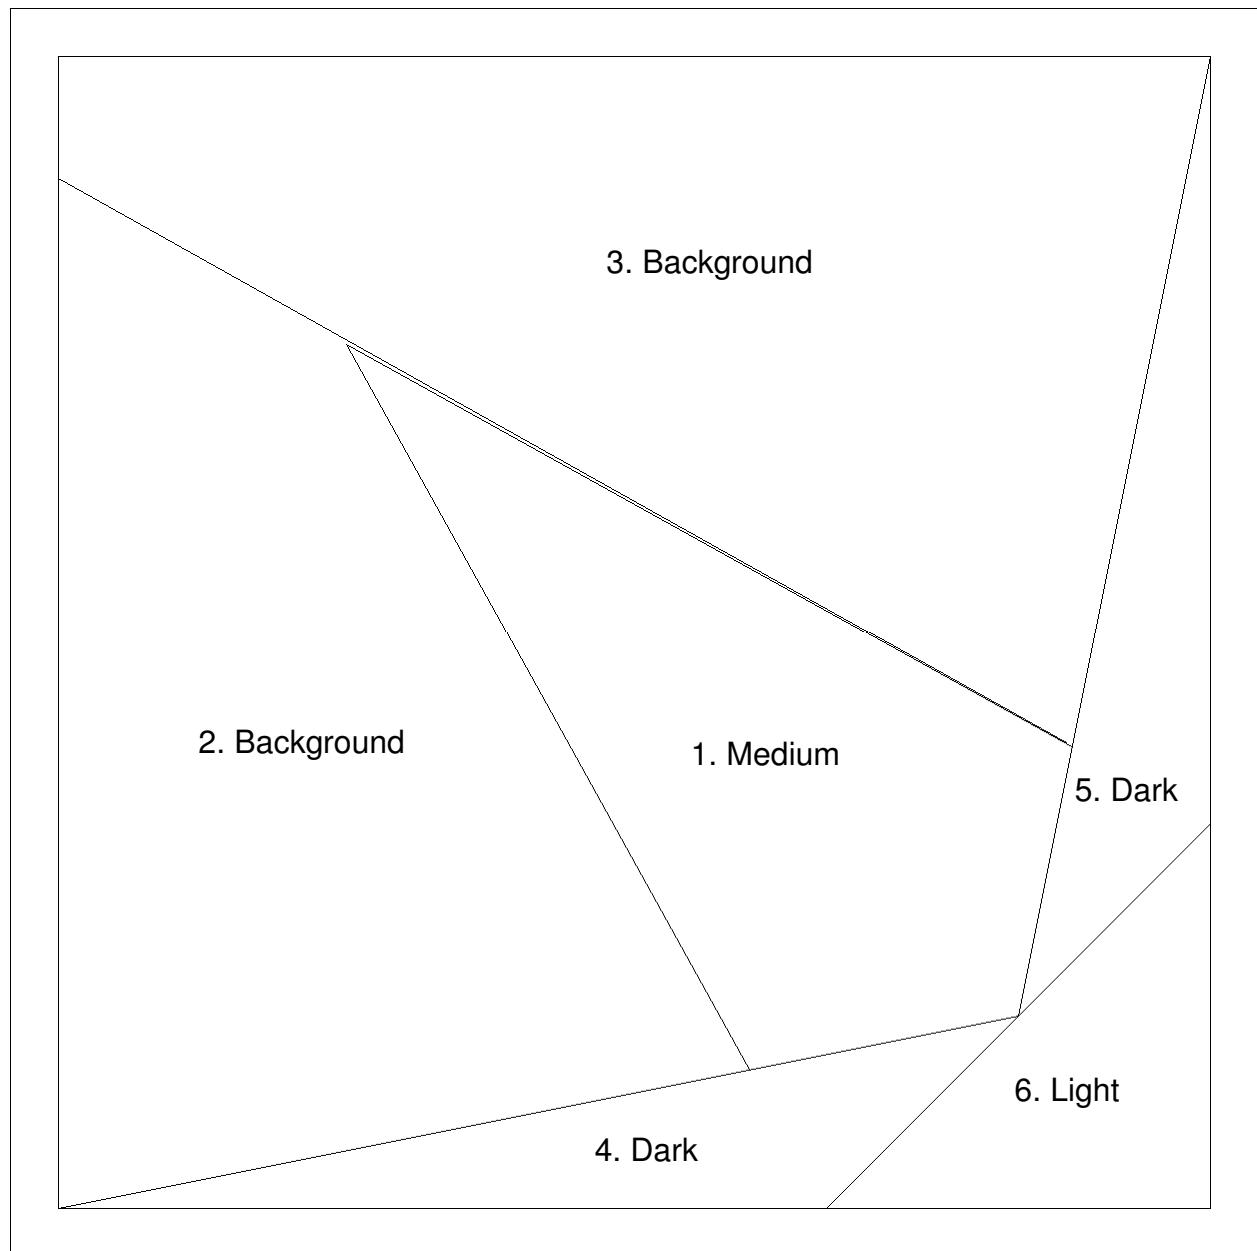

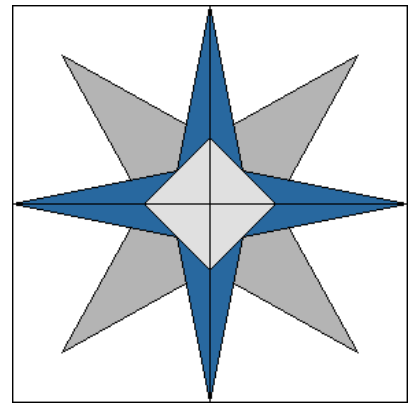

This block measures 12½" unfinished.

Sailors' Star 12.5" block

Print a test copy of the paper-piecing unit shown below. The inside perimeter line should measure 6" on all sides. The outside perimeter should be 6.5" all around.

Print 4 copies per block.
