

This block finishes at 12" or 6" square. It is a paper pieced (or foundation pieced) block.

INGREDIENTS

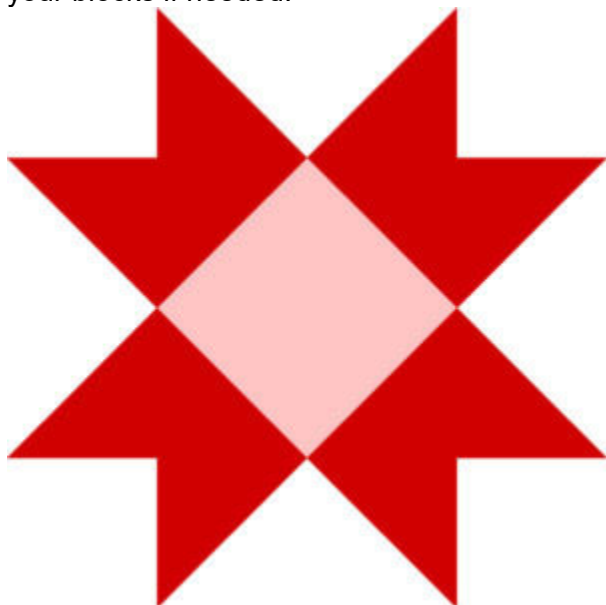

You will need a mix of 3 colors/prints for this block. Paper piecing requires some wasted fabric so start with a fat quarter for your main color. A fat eighth of the secondary color and a scrap for the third color works well.

INSTRUCTIONS

Download the templates from the Printer Friendly Version below. Print 4 copies of the foundation piecing template. Trim the excess paper off the printed sheets. Shorten your stitch length before you begin. Trim some pieces to cover each section of the block. Be generous! You need enough for seam allowances. Follow the stitch and flip method to paper piece the block. Press well. Join block sections.

YIELD

The unfinished block measures 6.5" or 12" square. Gently tear away the foundation paper before squaring up your blocks if needed.

And please tell us some of your favorite Christmas memories in the comments!
